

Assignment-1 Outputs

Chaoran,Cyril, Navnit

July 18, 2026

1 Part 1 Output

```
1 1
2 2
3 3
4 4
5 5
6 6
7 7
8 8
9 9
10 10
11 Array is empty or not initialized.
```

2 Part 2 Outputs

2.1 user Enter: 1

```
1 ===This is a simple program for translation of Points and triangle and
   calculating the area)===
2 Enter 1 to show triangle Demo, and 2 for user customizable Triangle demo: 1
3 ===Welcome to Part 2 demo: Using The Principles of OOP===
4
5 The values for the demoPoints: p1, p2, p3 is given p1: 1, p2: 2, p3: 3
6 The value of p1= 1 Translating demoPoints p1 with d=1 the axis = x the output
   is 0
7 The value of p1= 1 Translating demoPoints p1 with d=-3 the axis = x the output
   is 0
8 The value of p2=2 Translating demoPoints p2 with d=1 the axis = y the output
   is 0
9 The value of p3= 3 Translating demoPoints p3 with d=1 the axis = z the output
   is 0
10
11 Demonstrate if axis is not x or y or z:
12 The value of p4= q Translating demoPoints p4 with d=1 the axis = q the output
   is
13 The axis input could not be recognize
14 -1
15
16 Display points
17 the value of x-axis: -1
```

```

18 the value of y-axis: 3
19 the value of z-axis: 4
20
21 =====Triangle=====
22 Using points      the coordinates of the triangle are:
23 v1: (61, 12, 28)
24 v2: (12, 48, 6)
25 v3: (26, 18, 7)
26
27 Translate the triangle d=1 with 'x-axis' 0
28 the coordinates of the triangle are:
29 v1: (62, 12, 28)
30 v2: (13, 48, 6)
31 v3: (27, 18, 7)
32 The area of the triangle: 589.409$m^2$

```

2.2 User Enter: 2 or any invalid inputs

```

1  =====This is a simple program for translation of Points and triangle and
   calculating the area)=====
2  Enter 1 to show triangle Demo, and 2 for user customizable Triangle demo: a
3  Please try again - enter 1 or 2: p
4  Please try again - enter 1 or 2: a
5  Please try again - enter 1 or 2: s
6  Please try again - enter 1 or 2: d
7  Please try again - enter 1 or 2: f
8  Please try again - enter 1 or 2: g
9  Please try again - enter 1 or 2: h
10 Please try again - enter 1 or 2: jk
11 Please try again - enter 1 or 2: l
12 =====Welcome to Part 2 demo: Using The Principles of OOP=====
13
14 The values for the demoPoints: p1, p2, p3 is given p1: 1, p2: 2, p3: 3
15 The value of p1= 1 Translating demoPoints p1 with d=1 the axis = x the output
   is 0
16 The value of p1= 1 Translating demoPoints p1 with d=-3 the axis = x the output
   is 0
17 The value of p2=2 Translating demoPoints p2 with d=1 the axis = y the output
   is 0
18 The value of p3= 3 Translating demoPoints p3 with d=1 the axis = z the output
   is 0
19
20 Demonstrate if axis is not x or y or z:
21 The value of p4= q Translating demoPoints p4 with d=1 the axis = q the output
   is
22 The axis input could not be recognize
23 -1
24
25 Display points
26 the value of x-axis: -1
27 the value of y-axis: 3
28 the value of z-axis: 4
29

```

```

30 =====Triangle=====
31 Using points      the coordinates of the triangle are:
32 v1: (61, 62, 30)
33 v2: (8, 78, 65)
34 v3: (12, 93, 69)
35
36 Translate the triangle d=1 with 'x-axis' 0
37 the coordinates of the triangle are:
38 v1: (62, 62, 30)
39 v2: (9, 78, 65)
40 v3: (13, 93, 69)
41
42 The area of the triangle: 518.244$m^2$

```
